Description

Operator Comments:

In July of 2017, Laramie Energy, LLC ("Laramie") drilled the Bruton 19-12E Well, API 05-077-10365, from our Bruton 30-01 Pad in Section 30 of township 9 South, Range 93 West. The wellbore was directionally drilled 1529' feet to the North of the pad to a measured depth of 8352'. During the drilling, the bit drifted North of the target by 3 feet into the 100' set-back from our lease line. Please note that the wellbore did not cross the lease line, but merely encroached into the setback area by 3 feet. The well has been fraced and is currently flowing back for completion in the Williams Fork formation.

Our records indicate BL Management is the mineral interest owner in the Spacing Unit directly to the north of the Bruton 19-12E Well. The purpose of this letter is to inform you that the subject wellbore is 97 feet from the edge of our lease line while the applicable COGCC Spacing Order 429-13 stipulates that no well will be located less than 100 feet from the boundaries of the unit without an exception being granted by the Director of the Commission.

I hereby certify all statements made in this form are, to the best of my knowledge, true, correct, and complete.
