Abigail,

I have reviewed the referenced Fprm 2A Oil & Gas Location Assessment and have the following comment.

1) In the Water Resources section Bison Oil & Gas has indicated the estimated depth to groundwater is 114 feet based on water well Permit #23211. A review of that water well permit indicates the well was screened from 175 to 215 feet below ground surface. During my review I identified a water well (Permit #140559), that while slightly further away, was screened from 15 to 43 feet below ground surface and lists a depth to water of 11.5 feet. As this is more indicative of how shallow groundwater may be in this area and the surface elevation of this well and the proposed Oil & Gas Location are very close, I would like to change the estimated depth to groundwater from 114 feet to 12 feet.

Please respond to this correspondence by February 10, 2018. If you have any questions, please contact me. Thank you.

Good afternoon Doug,

Yes, please change the estimated depth to groundwater to 12'.

Thank you!
