 TOTAL % OF DESIRABLE VEGETATION COVER \_\_\_\_\_  
 VEGETATIVE COVER \_\_\_\_\_

Comment:

Contouring in project area is continuous with surrounding Landscape; Vegetation appears vigorous & well established. Vegetation Monitoring submitted by Operator show Vegetation Meeting the 80% Requirement. What keeps this Location from Passing Final Reclamation is that Access Road has not been Reclaimed. From Aerial Photos it appears Road was built to Access Location. It seems Road is allowing vehicle traffic access to site which may compromise Reclamation. Old sign is only Debris on Location & will need to be removed before Final Reclamation is Passed. Refer to Photos attached.

Corrective Action:

Perform Final Reclamation of Access Road; Reclamation Activities to be complete by June 1, 2018.
