Comment

Interim reclamation in-process. With exception to pit on north end of the location, location has been reduced to areas reasonably needed for production. Location appears to be within CRP non-cropland. Interim areas appear to have been ripped, however, areas do not appear to have been cross-ripped in accordance to 1003.c. This is being documented for future reclamation monitoring purposes. Pit requires closure. Interim areas require reseeding/revegetating as soon as practicable.
