Location Name: G & D Hanks /27-N Pad
Location ID: 453331

Photo 1. Photo taken from the southeastern location, facing East. Operator has a Disturbance Area staked along portions of the southern location. Staff did not observe other stakes/markers to delineate for the mapped wetland shown on the Hydrology Map (Doc. #401436127).

Photo 2. Photo taken just south of the location, facing East. Canada thistle (*Cirsium arvense*), a Facultative Upland species which can occur in wetlands, was observed along portions of the mapped wetland area. Staff did not appear to observe other wetland vegetation; however, this is not the growing season for wetland vegetation, making it difficult to identify plant species.
