## DESCRIPTION OF IMPACT

Impacted?	Impacted Media	Extent of Impact	How Determined
Yes	SOILS	90' (E-W) x 36' (N-S) x 14' bgs	Excavation, soil sampling, and laboratory analysis

## INITIAL ACTION SUMMARY

Description of initial action or emergency response measures take to abate, investigate, and/or remediate impacts associated with E&P Waste.

On September 8, 2017, historical impacts were discovered during abandonment activities at the Guy Jones GU #1 production facility. The facility was shut in, affected infrastructure removed, and excavation activities were initiated. Groundwater was not encountered in the excavation. The COGCC has issued Spill/Release Point ID 452201 for this release. A partially-buried produced water vessel was removed during excavation activities.

## PROPOSED SAMPLING PLAN

### Proposed Soil Sampling

☒ Will soil samples be collected as part of this investigation? ( Number, type (grab/composite), analyses, and locations of samples ):

Soil samples were collected as described in the Initial Form 27. Based on the data presented, constituent concentrations in the soil samples collected from the final lateral and vertical extents of the excavation area were in full compliance with State standards, except for the pH in samples S06@7', E06@13', and B07@14', collected below the root zone. Soil sample analytical data is presented in Table 1, and soil sample locations are illustrated on Figure 1. The laboratory analytical reports are included as Attachment A.

### Proposed Groundwater Sampling

☐ Will groundwater samples be collected as part of this investigation? ( Number, analyses, and locations of samples ):

### Proposed Surface Water Sampling

☐ Will surface water samples be collected as part of this investigation? ( Number, analyses, and locations of samples ):

## Additional Investigative Actions

☒ Additional alternative investigative actions described in attached Site Investigation Plan ( summary ):

A partially-buried produced water vessel was removed during excavation activities.

# REMEDIAL ACTION PLAN

Does this Supplemental Form 27A include changes to a previously approved Remedial Action Plan? No \_\_\_\_\_

## SOURCE REMOVAL SUMMARY

Describe how source is to be removed.

Between September 8 and October 4, 2017, approximately 1,180 cubic yards of impacted material were excavated and transported to the Kerr-McGee Land Treatment Facility in Weld County, Colorado. A partially-buried produced water vessel was removed during excavation activities.

## REMEDIATION SUMMARY

Describe how remediation of existing impacts to soil and groundwater is to be accomplished (i.e. summarize remedial action plan). Provide a brief narrative description including: technical justification, schedule for implementation, estimated time to attain NFA status, plus plans and specifications for the selected remedial action technology.

Laboratory analytical results indicate that constituent concentrations in the soil samples collected from the base and sidewalls of the final extent of the excavation area were in full compliance with State standards, except for the pH in samples S06@7', E06@13', and B07@14', collected below the root zone. Based on the analytical data presented herein, remediation is complete at this site and Kerr-McGee is requesting a No Further Action (NFA) determination for this release.
