OPERATOR COMMENTS:

Excavation work was initiated on 3/30/2018 once utility locates were completed. Following soil removal, Olsson Associates collected soil samples from the stockpiled soil, the base of the excavation beneath the flowline (~6 ft bgs), and from the side walls of the excavation at depths of 4 feet to 4.5 feet bgs. Soil samples were delivered to Origins Laboratory in Denver, CO for analysis of BTEX, GRO, DRO to compare to the COGCC Table 910-1 concentrations/levels. Approximately 29 cubic yards of soil were stockpiled onsite.

I hereby certify all statements made in this form are to the best of my knowledge true, correct, and complete.
