A photograph of an oil well pumpjack and separator in a field. The pumpjack is a vertical metal structure with a large wheel at the top. It is connected to a horizontal pipe that runs across the field. A large white plastic separator tank is mounted on a metal frame next to the pumpjack. The tank is partially filled with a yellowish liquid. In the foreground, there is a blue sign with white text. The background shows a dry, grassy field with a fence and hills in the distance.
