CONDITIONS OF APPROVAL, IF ANY:**COA Type****Description**

General Comments**User Group****Comment****Comment Date**

Reclamation Specialist	Location has a failing FR inspection in 2016 documenting location is 39% to that of reference area, inspection required additional reclamation activities. A follow-up inspection will need to be conducted to determine operator compliance with the corrective action and reclamation rules. Only one growing season has passed since CA date, based on experience it is unlikely that the location will have met reclamation standards with one growing season in this region.	04/04/2018
