Report of work done on well since previous report \_\_\_\_\_

Following is a (notice of intention to do work) October 23 19 53  
(~~report of work done~~) (On land) (patented) described as follows:

Colorado Logan Merino  
State County Field

#1 State 21 C. SE NW 6N 54W 6th  
(Well No.) (Lease) (Sec. and  $\frac{1}{4}$  Sec.) (Twp.) (Range) (Meridian)

The well is located 1980 ft. (~~N~~) of N. Line and 1980 ft. (E) of W  
(S) (~~N~~)  
Line of Sec. 21

The elevation above sea level is/ To be furnished later. ft.

Details of Plan of Work: (State names of and expected depths to objective sands; Show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work.)

We propose to drill a well using rotary tools on the above described location, the well to be known as State #1.

It is expected that approximately 165 feet of 10-3/4" OD, 32.75#/ft., H-40, 8RT casing will be landed and cemented to the surface. This well will be drilled to the "J" sand of the Dakota formation, which is expected at approximately 5100 feet.

If commercial production is encountered, a production string consisting of 5-1/2" OD 14# J-55, 8RT., casing will be set thru the producing formation and cemented with 150 sacks of cement. The productive zone will then be perforated.

All measurements will be taken from the Kelly Bushing.

Approved: OCT 26 1953
