TRANSECT RESULTS OF REFERENCE AREA% _____

TOTAL % OF DESIRABLE VEGETATION COVER _____

VEGETATIVE COVER _____

Comment: **Location does not meet COGCC 1000 series reclamation standards and requirements; insufficient desirable vegetative cover/ vegetation has not achieved uniform distribution. Areas of the former well, pit and battery facilities remain predominantly undesirable weedy plant species, or bare and exposed soil. Compaction concerns evident. See attached photo document.**

Corrective Action:	Perform reclamation in accordance to COGCC 1000 series rules including, but not limited to the removal of any remaining gravel/base, compaction alleviation (cross ripping) to a depth of eighteen (18) inches, and establish vegetation with total perennial, non-invasive uniform plant cover of at least eighty (80) percent of pre-disturbance or reference area levels. Use a seed mixture requested by the surface owner, or a mixture prescribed by the local county NRCS. Ensure erosion controls are implemented to stabilize the seeded soil, and continue to monitor and manage this site until Final Reclamation has passed. Revegetation activities shall be complete no later than 5/31/2018.	Date	05/31/2018
