TOTAL % OF DESIRABLE VEGETATION COVER _____

VEGETATIVE COVER _____

Comment:

<p>Previous inspections required operator to perform reclamation Including, but not limited to compaction alleviation per 1000 series reclamation rules at the well and former battery location, and revegetation activities. Operator submitted notice to inspector via email and FIRR #401471165 that corrective action has been addressed, that "location was ripped and cross-ripped, disc and seeded with alfalfa on November 22, 2017". Compaction alleviation appears to have been addressed. No perennial germination evident on battery location; unable to find evidence that revegetation/reseeding activities have been conducted or stabilization controls have been implemented per the corrective action. Original corrective action and date remains applicable.</p>		
Corrective Action:	<p>Perform reclamation in accordance to COGCC 1000 series reclamation rules and establish uniform vegetative perennial crop cover reflective of the reference area. Ensure erosion controls are implemented to stabilize the seeded soil, and continue to monitor and manage this site until Final Reclamation has passed. Revegetation activities shall be complete no later than 8/15/2017</p>	Date 08/15/2017
Overall Final Reclamation	Fail	Well Release on Active Location <input type="checkbox"/> Multi-Well Location <input type="checkbox"/>
