Comment:

Inspector Name: Binschus, Chris

No evidence of equipment at the battery or well location. Prior to development, the former battery and well location were cropland (turf farm). Currently, the battery location is located along corner of a pivot field which does not appear to be included as part of the crop production (turf farm). Appears the well location is fallow at the time of this inspection but might be included as part of the crop production. Operator will be responsible and shall comply with Reclamation rules and regulations if these areas are included as part of the crop production in the future. Refer to the attached inspection photos for more detail.
