Comment:

Operator has performed final reclamation activities at the well location, battery location and the well access road, with the evidence of drilling rows and straw crimped mulch. Some germination of grass species was evident along portions of the well access road and battery location but did not observe any reference area vegetation or germination (alfalfa). There was no germination of grass species or alfalfa throughout any portion of the well location.

Operator has failed to reclaim a portion of the battery access road. Refer to the attached inspection photos for more detail.

Corrective Action:

Comply with Rule 1004 immediately, regarding the battery access road.
