**Reclamation - Storm Water - Pit**

**Storm Water:**

Loc Erosion BMPs	BMP Maintenance	Lease Road Erosion BMPs	Lease BMP Maintenance	Chemical BMPs	Chemical BMP Maintenance	Comment

**Comment:** Appears stormwater runoff from the battery location is causing rill erosion off location. There were no observed BMPs being implemented along the battery location to minimize erosion- Photos 1-3. A cattle guard along the main access road is in need of maintenance- Photo 4. Refer to the attached inspection photos for more detail. See COGCC comments for more information.

**Corrective Action:** Install or repair required BMPs per Rule 1002.f. This is a short corrective action date because monsoon weather conditions have already started to occur.

Date: 05/23/2018

**Pits:**  NO SURFACE INDICATION OF PIT

A similar inspection will be sent to the other Operator that also uses the cattle guard BMP on the main access road. Both Operator's will need to coordinate to perform the required maintenance for that BMP- Photo 4.	binschusc	05/16/2018
Operator shall employ BMPs, as necessary to comply with Rule 1002.f., at all oil and gas locations, including, but not limited to, well pads, soil stockpiles, access roads, tank batteries, compressor stations, and pipeline rights of way. BMPs shall be selected based on site-specific conditions, such as slope, vegetation cover, and proximity to water bodies, and may include maintaining in-place some or all of the BMPs installed during the construction phase of the facility. Where applicable based on site-specific conditions, Operator shall implement BMPs in accordance with good engineering practices.	binschusc	05/16/2018
