**Photo 1.** Photo taken from the location entrance, facing North. Appears the Operator has not performed final reclamation activities for the access road, the cattle guard and access road remain on location. A List B Colorado Noxious weed species, Scotch thistle (*Onopordum acanthium*), is found at high densities along the access road and on location.

**Photo 3.** Photo taken from location, facing Southeast. Equipment is still on location. Appears the Operator has performed final reclamation activities, with the evidence of drilling rows and straw crimped mulch. However, the majority of the site is either barren or covered in weedy, annual vegetation which includes but not limited to cheatgrass and kochia.
