RE: **Surface Owner Consent**  
Statewide Horizontal Offset Policy  
Sec. 04 T1S R65W-Weld County, Colorado

Dear Mr. Roger & Verna Allgeier:

The wells listed below are located within your current property boundary. These wells were plugged and abandoned to the standards required by the Colorado Oil and Gas Conservation Commission ("COGCC") at the time. However, Pursuant to the COGCC's Interim Statewide Horizontal Offset Policy, dated February 10, 2014, additional work is required on these wells before new horizontal wells within 1,500' can be hydraulically stimulated.

- **Penrod 4-3** (API #05-001-08766): Drilled March 1986, plugged April 17, 1987
- **Haskins 4-12** (API #05-001-09199): Drilled April 1994, plugged April 22, 1994
- **Cimarron-Penrod 2** (API #05-001-08830): Drilled July 1987, plugged July 25, 1987
- **Helen M Penrod 1** (API #05-001-06867): Drilled July 1974, plugged July 23, 1974

Pursuant to the COGCC Policy, Confluence is required to obtain surface owner consent before accessing the subject wells. Our plans for these wells are detailed below and you will receive communication at least one week prior to all operations detailed below:

- Accessing the property with heavy equipment to re-enter the wells and bring the wells abandonment up to today's standards.
- Accessing the property to conduct final reclamation to return the land to its current state.

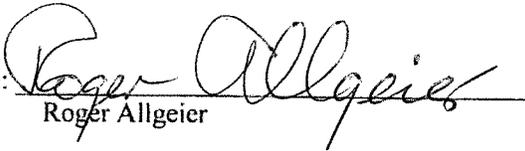

As mentioned above, the surface owner's consent is required. Should you find these plans acceptable, please sign the space provided below.

Please contact me at 303-226-9506 or at [amallon@confluencelp.com](mailto:amallon@confluencelp.com) if you have any questions.

Sincerely,

Angela Mallon

By signing below, you consent to allow Confluence DJ LLC the right to access your property to re-enter the Penrod 4-3, Haskins 4-12, Cimarron-Penrod 2, and Helen M Penrod 1.
