**General Comment:**

This is a follow-up interim reclamation and stormwater inspection to inspection doc. #689900063, doc. #67313723 and #682503283. Any corrective action(s) from previous inspections that have not been addressed are still applicable. Due to outstanding corrective actions, this is being recommended for enforcement.

Location			
<b>Lease Road:</b>			
Type	Access		
comment:	Multiple previous inspections has documented that a fence has been constructed across the access road (coordinates 38.94974 / -10339839), forcing vehicle traffic off the road to utilize a gap in the corner of the fence to the east. Operator has been notified that a gate should be installed to minimize surface disturbance to areas off the access road. Operator has failed to mitigate and minimize surface disturbance in accordance to 1002.e(4)		
Corrective Action:	Install a gate to allow vehicle traffic to travel on access road.		Date: 07/05/2018
Overall Good: <input type="checkbox"/>			
<b>Signs/Marker:</b>			
Type	TANK LABELS/PLACARDS		
Comment:	Previous inspections documented incomplete signage on the three (3) tanks at the battery without any signage, and required operator to install signage to comply with Rule 210.d. Signage remains incomplete and corrective action has not been addressed; corrective action and corrective action date remains applicable.		
Corrective Action:	Install sign to comply with Rule 210.d.		Date: 10/10/2016
Type	WELLHEAD		
Comment:	At locked Gate		
Corrective Action:			Date:
Type	OTHER		
Comment:	Previous inspections documented that the lease road sign located at CR 26 had incorrect operator information and required operator to install sign to comply with Rule 210.e. Signage located at lease road and CR 26 remains uncorrected. Corrective action has not been addressed; corrective action and corrective action date remains applicable. This corrective action and date remains applicable.		
Corrective Action:	Install sign to comply with Rule 210.e.		Date: 10/10/2016

Comment

Previous inspections documented that the production area and location are not stabilized, that areas on the west side of the pad have eroded and degraded. It was also documented that vegetation in the interim areas have not adequately established and required operator to perform additional reclamation in accordance to 1003. Erosion degradation remains evident on the western areas of the pad/location. Large areas of the interim remain bare and exposed soil. In addition compaction concerns have also been identified. Corrective action has not been addressed; corrective action and corrective action date remains applicable.

Corrective Action

Perform reclamation in accordance to COGCC 1003 series rules including, but not limited to, re-contouring and repairing eroded areas of the pad and location, compaction alleviation and establish vegetation with total perennial, non-invasive uniform plant cover of at least eighty (80) percent of pre-disturbance or reference area levels. Use a seed mixture requested by the surface owner, or a mixture prescribed by the local county NRCS. Ensure erosion controls are implemented to stabilize the seeded soil, and continue to monitor and manage this location.

Well Release on Active Location ☐Multi-Well Location ☐**Storm Water:**

Loc Erosion BMPs	BMP Maintenance	Lease Road Erosion BMPs	Lease BMP Maintenance	Chemical BMPs	Chemical BMP Maintenance	Comment

Comment: Previous inspections documented erosion concerns to the southwest end of the wellhead and required erosion to be repaired, and stormwater and sediment control BMPs installed or repaired. Areas of erosion appears to have continued to worsen with further erosion encroachment onto the interim reclamation areas. Location remains unstabilized. In addition, the berm along the perimeter of the location has not been maintained and not in proper functioning condition; berm should have been reclaimed during interim reclamation. Corrective action has not been addressed; corrective action and corrective action date remains applicable.

Corrective Action: **Install or repair required BMPs per Rule 1002.f.**

Date: 09/09/2016
