**General Comment:**

On 7/9/2018, COGCC staff, Kris Neidel inspected the Craig 1-7 well, this was an Environmental inspection. The well was shut-in during inspection. Soil staining was observed in the following areas: load out, back side of tanks, at pipe fittings inside the treated area, at the wellhead, at pumpjack exhaust. Spills have been mentioned on the following COGCC inspections; 12/1/1996 (Document 500154562), 3/28/2000(Document 200006019), 4/5/2001(Document 200015671), 9/17/2002(Document 200033647), 11/17/2010(Document 200290822), 10/25/2013(Document 673400042), 9/8/2014(Document 673401077), 2/9/2015(Document 673401770), 3/16/2015(Document 673401907), 2/24/2016(Document 673402957), 6/14/2016 (Document 673403260), 5/2/2017(Document 673404536). Stained soil and spills were noted in the following areas; wellhead, pipe connections, pumping unit exhaust, inside tank battery and an unknown area. A form 27 should be submitted that outlines the plan for the removal of all remaining impacted material and demonstration that remaining soils comply with COGCC table 910-1. Please contact Kris Neidel, COGCC Environmental Staff at 970-871-1963 with any questions.
