Comment:

The area used for parking has been made off limits to any workers, no area outside the pad surface is being used for parking. Thus there is no need to modify the location drawings to represent "parking access". The access road will be gated and locked as per the BMP 1.M, the reference to the fence was intended to accommodate a perimeter fence that would connect to the gate. The existing fence is connected to the gate to control access and allow livestock to move freely (inside) on the property. Please see the attached photograph for additional detail.
