**Photo 1:** Photo taken from the western interim areas of the location, facing west. Previous inspection required management and removal of noxious weeds.

Photo shows Diffuse Knapweed (lighter, grey-green plants, white colored flowers) remains prevalent on location and access roads. Though there is evidence of herbicide, spraying does not appear to have been sufficient as many plants appear to be viable and have continued to mature/flower

**Photo 2:** See comments under photo 1.

**Photo 3:** Photo taken from the access road. Previous inspection required management and removal of noxious weeds.
