Comment:

| | | |
|---|--|------------------------|
| Corrective Action: | Previous inspections required operator to perform reclamation Including, but not limited to compaction alleviation per 1000 series reclamation rules at the well and former battery location, and revegetation activities. Operator submitted notice to inspector via email and FIRR #401471165 that corrective action has been addressed, that "location was ripped and cross-ripped, disc and seeded with alfalfa on November 22, 2017". No perennial germination evident on battery location; battery location remains predominantly bare and exposed soil, or vegetated by undesirable weedy plant species. Unable to find evidence of crop establishment. Adjacent reference area perennial alfalfa crop. Original corrective action and date remains applicable. | Date 08/15/2017 |
| | Perform reclamation in accordance to COGCC 1000 series reclamation rules and establish uniform vegetative perennial crop cover reflective of the reference area. Ensure erosion controls are implemented to stabilize the seeded soil, and continue to monitor and manage this site until Final Reclamation has passed. Revegetation activities shall be complete no later than 8/15/2017 | |
| Overall Final Reclamation Fail Well Release on Active Location <input type="checkbox"/> Multi-Well Location <input type="checkbox"/> | | |
