Comment:

Corrective Action:	Perform reclamation; Collaborate with the surface owner to determine a seed mixture to be used to stabilize the location with total perennial, non-invasive uniform plant cover. Ensure erosion controls are implemented to stabilize the seeded soil, and continue to monitor and manage this site until Final Reclamation has passed. To allow for a fall seeding, revegetation activities shall be complete no later than 11/15/2017.	Date

COGCC Comments

Comment	User	Date
Comment taken from 7/12/2017 inspection: Well was PAd 10/16/2015. Two growing seasons have passed for the surface owner to return the well location back into crop production. It does not appear as though the surface owner intends to farm the area of the well location. Location will need to be stabilized with perennial, non-invasive uniform plant cover.	trujilloam	07/18/2018
