**General Comment:**

Inspection was conducted to evaluate surface conditions at the location. See attached photos.

Following observations were made:

1. Liquid is flowing downslope from facilities in southern project area. Noise observed.
2. Open pipe with oily material in southern project area.
3. Rilling observed in northeastern project area and on well pad.
4. Russian knapweed established within project area.
5. Russian thistle concentrated around well ad southwestern project area.
