2 CA# 85881

Corrective Action: Permanent stormwater controls need to be installed to stabilize the northwestern portion of the project area.

Date: 08/18/2017

Response: CA COMPLETED

Date of Completion: 07/09/2018

Operator Comment: After lengthy negotiations with the landowner they agreed to allow BP access to the property to install a rock rundown to slow the velocity of storm water on the northwestern corner of the well pad. BP has installed the BMP's authorized by the surface owner. BP no longer has access to this location without contacting the landowner and having them unlock the gate for BP or it's contractors. Landowner believes that the surface has been returned to them and they intend to utilize this land as an area for storage for their equipment and belongings as they see fit.

COGCC Decision:

OPERATOR COMMENT AND SUBMITTAL

Comment: Corrective Actions have been addressed to the best of BP's ability as the well was plugged and abandoned in 2013 and the surface owner has since removed the BP lock and BP can only access when landowner will agree to unlock the gate.

I hereby certify that the statements made in this form are, to the best of my knowledge, true, correct, and complete.
