Good Afternoon Melissa,

We met with our engineers this afternoon and they are going to resurvey the State Bierstadt location to use the existing pad for the addition of the four wells. Because of the existing facilities design, we will need to add an additional facilities set, but ultimately our engineers think that we can reduce the overall footprint (the extent will be determined after we resurvey). At your leisure, please withdraw the following document number: 401638665. Once we have resurveyed, Liang will work with Shanelle to address the SHL changes required.

Respectfully,

Jennifer Dixon

RBU-Regulatory Coordinator
