Yes	SOILS	600 cu. yards	Initial Sampling

### INITIAL ACTION SUMMARY

Description of initial action or emergency response measures take to abate, investigate, and/or remediate impacts associated with E&P Waste.

Initial sampling had been conducted in order to discover the extent of the impacted soil in the pit.

### PROPOSED SAMPLING PLAN

#### Proposed Soil Sampling

☒ Will soil samples be collected as part of this investigation? ( Number, type (grab/composite), analyses, and locations of samples ):

Once all impacted soil has been excavated and disposed of. Sampling from all 4 walls and the pit bottom will take place for TPH and BTEX. Inorganic samples will be taken from all 4 pit walls for EC, SAR, and pH.

#### Proposed Groundwater Sampling

☐ Will groundwater samples be collected as part of this investigation? ( Number, analyses, and locations of samples ):

#### Proposed Surface Water Sampling

☐ Will surface water samples be collected as part of this investigation? ( Number, analyses, and locations of samples ):

### Additional Investigative Actions

☐ Additional alternative investigative actions described in attached Site Investigation Plan ( summary ):

# SITE INVESTIGATION REPORT

## SAMPLE SUMMARY

### Soil

## OTHER INVESTIGATION INFORMATION

☐ Were impacts to adjacent property or offsite impacts identified?

☐ Were background samples collected as part of this site investigation?

☐ Was investigation derived waste (IDW) generated as part of this investigation?

Volume of solid waste (cubic yards)

Volume of liquid waste (barrels)

☒ Is further site investigation required?

We will excavate all impacted soils and then collect samples again from all 4 walls and the pit bottom as well as inorganic samples from each wall.

# REMEDIAL ACTION PLAN

## SOURCE REMOVAL SUMMARY

Describe how source is to be removed.

Excavate all impacted soil from pit using a track hoe.

## REMEDIATION SUMMARY

Describe how remediation of existing impacts to soil and groundwater is to be accomplished (i.e. summarize remedial action plan). Provide a brief narrative description including: technical justification, schedule for implementation, estimated time to attain NFA status, plus plans and specifications for the selected remedial action technology.

We will excavate all impacted soils from the pit and dispose of at North Weld Landfill located in Ault. Confirmation samples will be collected from all 4 walls and pit bottom to ensure all hydrocarbon impacted soil was removed. Samples for inorganics will be collected from each wall, along with a background sample to compare to. If the samples results exceed table 910-1 standards then the inorganic impacted soil will be buried in the pit not to exceed 3 ft. from surface. If we have excessive inorganic impacted soil that will exceed 3 ft. from surface in the pit, then this soil will be disposed of at North Weld Landfill in Ault.

## RECLAMATION PLAN

### RECLAMATION PLANNING

Describe reclamation plan. Discuss existing and new grade recontouring; method and testing of compaction alleviation; and reseeding program, including location of new seed, seed mix and noxious weed prevention. Attach diagram or drawing.

Once all remediation activities have been completed, we will recontour the location back to original grade and then cross rip the entire disturbed area along with the road. The lease and road are located in a workable field so no reclamation seeding will be necessary.
