Comment: [Inspection doc. #6820551805, #682502590 and #682502913 required operator to perform reclamation on the locaiton and access road in accordance to COGCC 1000 series reclamation rules. However, location access road remains predominantly undesirable weedy plant species, or bare and exposed soil. Access road has not been recontoured/regraded to the adjacent lands. Unable to find evidence that revegetation/reclamation activites per the corrective action have been conducted. Original corrective action and date remains applicable.](#)

Corrective Action:	Perform reclamation in accordance to COGCC 1000 series reclamation requirements including, but not limited to, compaction alleviation, recontour/regrading and establish vegetation with total perennial, non-invasive uniform plant cover of at least eighty (80) percent of predisturbance or reference area levels on the access road and location. Use a seed mixture requested by the landowner, or a mixture prescribed by the local county NRCS. Ensure erosion controls are implemented to stabilize the seeded soil, and continue to monitor and manage this site until Final Reclamation has passed.	Date	05/31/2017

		Multi-Well Location	<input type="checkbox"/>

COGCC Comments

Comment	User	Date
Original inspection date 03/20/2017, Correcive action date 5/31/2017. This is the 4th inspection requiring reclamation activities to be conducted. It has been over 1 year since reclamation was required per the corrective action. This is being considered for enforcement.	trujilloam	08/03/2018
