COMMENTS:

Burlington Resources respectfully request an amendment to the above named location's Form 2A. BMP Number 16 is technically infeasible due to electrical classification challenges and solids control issues that will result from enclosing the shakers and cuttings management system.

In lieu of BMP #16 for odor mitigation, Burlington Resources requests the following odor mitigation: "All open top tanks and process equipment containing oil-based mud will be kept more than 1100' away or more from building unit "

H2S REPORTING

Data Fields in this section are intended to document Sample and Location Data associated with the collection of a Gas Sample that is submitted for Laboratory Analysis.

Gas Analysis Report must be attached.

H2S Concentration: _____ in ppm (parts per million) Date of Measurement or Sample Collection _____

Description of Sample Point:

Absolute Open Flow Potential _____ in CFPD (cubic feet per day)

Description of Release Potential and Duration (If flow is not open to the atmosphere, identify the duration in which the container or pipeline would likely be opened for servicing operations.):

Distance to nearest occupied residence, school, church, park, school bus stop, place of business, or other areas where the public could reasonably be expected to frequent: _____

Distance to nearest Federal, State, County, or municipal road or highway owned and principally maintained for public use: _____
