Photo 1: Photo taken from the location, facing north. Photo shows riser remaining on the location. Riser appears to be interfering with farming activities as farmer appears to have to travel around equipment while planting crop. Area around riser remains bare and exposed soil or predominantly undesirable weedy plant species. Riser requires removal in accordance to 1004.a

Photo 2: Photo taken from the area of the riser, facing northwest. Photo shows location remains predominately undesirable weedy plant species and is not reflective of the reference area.

Photo 3: Photo taken from the location, facing southwest. Photo shows areas of the location where crop has been unable to establish. Additional reclamation activities required.

Photo 4: Photo taken from the adjacent reference area.
