VEGETATIVE COVER _____

Comment:

	Location does not meet Final Reclamation requirements. Location & Access Road have not been re-contoured & reclaimed. Debris and facilities have been removed. Operator indicated that Pad area had been seeded after Well was PA'd. Portions of site have good establishment of perennial vegetation though pad area remains compacted & areas are bare or sparsely vegetated. Tops of Berms (which appears to be topsoil) around site are not revegetated & appear to be used for livestock access & loafing areas. This Location was in the best condition of the three Locations visited. A few Noxious weeds (Houndstongue) were noted on site. Refer to Photos attached for detail of site conditions.	
Corrective Action:	Perform Final Reclamation per COGCC 1004 Rules including re-contouring, seeding of site and reclamation of access road. Install appropriate BMPs to stabilize location until vegetation establishes; all Reclamation Activities to be complete by November 15, 2018.	Date 11/15/2018
Overall Final Reclamation	Fail	Well Release on Active Location <input type="checkbox"/> Multi-Well Location <input type="checkbox"/>
