**COGCC Comments**

Comment	User	Date
Inspector on location in response to phone call received at 7:30 AM 9/7/2018 to notify COGCC of fire caused by equipment failure, resulting in 6.1 acre burn of vegetation on private land immediately adjacent to the location. The fire was caused when back pressure control valve for the heater treater, which was located on the line to the combustor, failed, allowing condensate to be blown towards ignitor. Dried vegetation on location perimeter caught on fire and was extinguished by local fire department.	waldrone	09/07/2018
