As defined in COGCC 100-Series Rules

Describe what is known about the spill/release event (what happened -- including how it was stopped, contained, and recovered):

On 09/14/18 at 13:10 a flowline leak was discovered, shut-in and isolated. The flowline is from the Loudder 14-7 #2 well to the Loudder tank battery. The leak was discovered by the pumper. The well was shut in and the extent of the release was walked by the pumper. The release was contained by creating a soil berm at the low end of the release. A vac truck was on site within ~15 minutes and began removing liquid. A clean-up crew was dispatched to help the vac truck remove the liquid. 145 bbl of liquid was recovered from the surface consisting of ~3 bbl oil and ~142 bbl water (see attached picture of wellhead sample from 9/13/18 showing 2% oil cut). The clean-up crew prepared the oil stained soil for removal. Eagle Enviromental was dispatched to take a soil sample and a water sample from a small pond in a low spot in the field located ~140' past the end of the release. The oil stained soil will be removed on 9/17/18 by M&M Excavation and hauled to disposal at Waste Management.

**OPERATOR COMMENTS:**

Please the description of the flowline leak events. All fluid has been recovered and placed in a tank at the tank battery and contaminated soil will be hauled under manifest to waste management on 9/17/18. On site inspection was performed with Susan Sherman. Analytical samples will be taken and submitted after the clean up is complete. Livestock was not present at the time of the release.

I hereby certify all statements made in this form are to the best of my knowledge true, correct, and complete.
