Subject: Update on COGCC Response to Complaint 200446018
Date: Friday, September 7, 2018 2:40:00 PM

Following is an update on the COGCC's investigation in response to the discovery of dissolved methane, ethane, and propane in your domestic water well.

1. COGCC required companies operating oil & gas wells located within 0.75-miles of your water well to provide your residence with an alternate supply of water.
 - a. Boulder Water has installed a temporary system with two (2) aboveground water tanks piped into your residence. Boulder Water is maintaining that system and delivering water.
2. Companies operating oil & gas wells located within 0.75-miles of your water well were required to submit information on the construction and operational history of their wells.
 - a. COGCC engineering staff are reviewing those submittals to assess potential well integrity issues.
3. Production gas samples were collected from the above-mentioned oil & gas wells and submitted for laboratory analysis.
 - a. COGCC environmental staff are evaluating the analytical results.
4. As a precautionary measure, ground water samples are being collected from 10 domestic water wells located within 0.5-miles of your water well.

If you should have questions concerning our investigation, please do not hesitate to contact me. My contact information is listed below.

Sincerely,

Chris
