Complaint

Comment: [Inspection in response to complaint.](#) [18#200446243](#)

Field Inspector Assigned: Adam Kraich

Complaint Received:

Date: 9-12-2018

Complaint Contacted:
Date: 9-12-2018 @14:57. Left VM, no callback.

Location #: 333083

Inspection Document #: 691300506

Nature of complaint: Odor

Field Inspector Actions:

On 9-12-2018, I received a complaint in regard to odor coming from the MSSU (Muddy Sand Stone Unit) location operated by Prospect Energy.

On 9-12-2018, I performed a site inspection of the location. The location is utilizing enhanced recovery by way of injecting produced water into their respective formations. I did experience an odor at the facility, the odor was consistent with that of produced brine water. After speaking with the operator, it has been determined that the odor is originating from the bulk water storage tanks at the injection facility. Additionally, I tested the injection area with a 4 gas monitor as well as a dedicated H2S monitor to ensure odors were not hazardous.

As odors are traveling off location, I have issued a corrective action 805.b to the operator, however, mitigation of the issue will require heavy equipment and pre job safety planning, and as such the corrective action date will be extended to accommodate these processes.

All information reviewed and site inspection information were submitted to the complaint specialist for further review.

Corrective Action: _____ Date: _____
