General Comment:

This inspection is in response to a complaint regarding remaining flowline and risers on the South Platter River (channel).

On September 6, 2018 the Logan County Water Conservation District filed a formal complaint (#200446233) indicating that abandoned flowlines and risers are currently exposed within the channel, are obstructing normal flow of water, and causing debris to collect on the exposed pipe leading to erosion to the main channel.

On 9/10/2018 Reclamation Specialist (RS) Trujillo received notice of the complaint and contacted the complainant via phone at 15:51 hours.

On 9/11/2018 RS Trujillo met with complainant to review and document concerns. Please see the "Reclamation" section of this report.

Comment: This final reclamation inspection is in response to a complaint. Two (2) risers remain exposed on location and adjacent to the ditch canal. Additionally an exposed flowline remains across the ditch (40°33'10.81"N, 103°14'40.52"W). Please see attached photo document. Complainant expressed concerns that lines present an impediment that collects debris and creates a problem for water diversion and erosion in the channel and bank. Flowline currently collecting various debris.

Corrective Action:	Perform reclamation and properly remove the exposed flowline/risers (cut/cap below grade and remove the pipe above surface), and any remaining equipment. Contact and collaborate with the surface owner (Logan County Water Conservancy District, Sterling No. 1 Ditch Company) to determine appropriate measures for removal work to be conducted to prevent any additional (or future) degradation from occurring to channel and bank.	Date	11/15/2018
