

Inspection Photos

Location Name: Homer Deep Unit 9-41

Location ID: #432260

Inspection Date: September 19, 2018

Photo #1 – Arrow depicts location of severed 10" poly line that was source of release to center of pad (assigned Spill/Release ID #457569).

Photo #2 – Google Earth 2016 aerial photo provided by operator depicts location of severed 10" poly line in relation to historical Pit ID #432420. COGCC records indicate that pit was abandoned by previous operator in November 2017. See Remediation Project #10495 for additional information.

Location Name: Homer Deep Unit 9-41

Location ID: #432260

Inspection Date: September 19, 2018

Photo #3 – View of exposed, severed 10” poly line that was source of Spill/Release ID #457569.

Photo #4 – Produced water released from 10” polyline flowed NW into stormwater ditch overlying former pit location. Operator constructed containment berm along ditch.

Inspection Photos

Location Name: Homer Deep Unit 9-41

Location ID: #432260

Inspection Date: September 19, 2018

Photo #9 – Additional produced water impacts located ~130' SE of tank battery at distal end of severed 10" poly line (Spill/Release ID #457570). Note operator constructed berm of black liner material to prevent release from entering into stormwater culvert.

Photo #10 – 10" poly line from previous photo leads into stormwater ditch on south side of lease road through a culvert. Produced water impacts from Spill/Release ID #457570 extend into this ditch for approximately 200'.
