Date: 10/03/2018

**Photo 1. View of the project area from the northwestern corner facing center.**

**Photo 2. View of the western project area from the northwestern corner facing southward. Vegetation is becoming established with grasses such as western wheatgrass (*Pascopyrum smithii*) and forbs such as hairy goldenaster (*Heterotheca villosa*).**

**Photo 2. View of the eastern project area from the southeastern corner facing northward.**

**Photo 3. View of area in the northwestern project area where stormwater flows off of the well pad, scouring the rocky upper portions, and depositing sediment down-slope.**

**Photo 4. View of Canada thistles (*Cirsium arvense*), some treated and some alive, in the western project area. Approximately 15 individuals observed.**
