6. DESCRIBE PROPOSED OR COMPLETED OPERATIONS

On July 12, 1996 a Notice Of Alleged Violation was issued to Energy Search Company, Inc. requiring corrective action on the subject well to be completed by January 12, 1997.

In order to correct the alleged violation Energy Search is prepared to:

1. Pull tubing and swab well to determine if the well is capable of being returned to producing status, or
2. Permanently plug and abandon.

Based on our recent inspection of the site we estimate that .50 to .75 mile of road will have to be built to accomodate equipment. Therefore, we respectfully request an extension of 6 months from the January 12, 1997 deadline in which to complete our proposed evaluation. This extension will allow us ample time to meet with surface owner, determine the best access route and conduct operations during warm weather.
