INITIAL ACTION SUMMARY

Description of initial action or emergency response measures take to abate, investigate, and/or remediate impacts associated with E&P Waste.

Collected soil samples from the 4 pit walls and pit floor. No contamination indicted in lab results. Filed Form 27 for closure.

PROPOSED SAMPLING PLAN

Proposed Soil Sampling

Will soil samples be collected as part of this investigation? (Number, type (grab/composite), analyses, and locations of samples):

Pit was never utilized. Grab samples were taken from the pit floor and the North, South, East and West walls of the pit. Three random soil samples were pulled from around the location to establish Arsenic background levels.

Proposed Groundwater Sampling

Will groundwater samples be collected as part of this investigation? (Number, analyses, and locations of samples):

Proposed Surface Water Sampling

Will surface water samples be collected as part of this investigation? (Number, analyses, and locations of samples):

Surface water samples will not be collected as Hancock Gulch which is 900' away is dry.

Additional Investigative Actions

Additional alternative investigative actions described in attached Site Investigation Plan (summary):
