### INITIAL ACTION SUMMARY

Description of initial action or emergency response measures taken to abate, investigate, and/or remediate impacts associated with E&P Waste.

At this point, there hasn't been a spill or incident associated with this well. KPK will locate the line and assess the area nearby in comparison with the location identified as having high TPH nearby KPK's property. Subsequent sampling analysis will be submitted to the COGCC.

### PROPOSED SAMPLING PLAN

#### Proposed Soil Sampling

☒ Will soil samples be collected as part of this investigation? ( Number, type (grab/composite), analyses, and locations of samples ):

At this point, there hasn't been a spill or incident associated with this well. KPK will locate the line and assess the area nearby in comparison with the location identified as having high TPH nearby KPK's property. Subsequent sampling analysis will be submitted to the COGCC. KPK will start locating the line associated with this well via hydrovac, this process should take at least one week. Once the line is located, and other line locations are cleared/marked, borings will be drilled and samples collected for TPH testing. Drilling the borings should take an additional week and laboratory analysis should take an additional week. KPK expects to submit an update on this investigation by mid-January considering the holidays.

#### Proposed Groundwater Sampling

☐ Will groundwater samples be collected as part of this investigation? ( Number, analyses, and locations of samples ):

#### Proposed Surface Water Sampling

☐ Will surface water samples be collected as part of this investigation? ( Number, analyses, and locations of samples ):

Provide a brief narrative description including: technical justification, schedule for implementation, estimated time to attain NFA status, plus plans and specifications for the selected remedial action technology.

At this point, there hasn't been a spill or incident associated with this well. KPK will locate the line and assess the area nearby in comparison with the location identified as having high TPH nearby KPK's property. Subsequent sampling analysis will be submitted to the COGCC. If remediation is required, KPK will update this form.
