Oil & Gas Conservation Commission
William R. Smith
Senior Petroleum Engineer

Dear Mr. Smith,

In regard to the two wells of A. B. Chase, it
should be Nuton Oil Co..

These two wells, the Rissman #1 and the Addis #1
have been plugged as of June 28th 1961.

T.D. 2210 NO OIL

*T.D. 2123
NO OIL*

They have 10 sacks of cement in bottom. There is
1,000 feet of 5½ inch casing left in hole, 10
sacks in top of 5½ inch casing, 5 sacks in top of
surface pipe.

Mr. Syllas Nuton is the man that drilled the wells.

I hope this will help you close this deal. I do
not know where Mr. Nuton is.

As Ever,

Vaughn Burgess
