OPERATOR COMMENTS AND SUBMITTAL

Comments Laramie Energy utilizes the Trimble GNSS R1 receiver which provides professional grade positioning information. All as-built wellhead data was collected while using sub-meter corrections with the Satellite-Based Augmentation System (SBAS) which provides sub-meter accuracy in the field. Therefore, there is no PDOP figure.

Pressure testing information was not included as Laramie Energy will be abandoning this line in the next 30-45 days.

I hereby certify that the statements made in this form are, to the best of my knowledge, true, correct and complete.
