General Comment:

On October 26, 2018 COGCC SW EPS Jim Hughes conducted an environmental field inspection of the Linde Inc. Airco #2 Natural Gas Well Spill/Release Point ID #458267. A Linde representative was on site during this field inspection. It was reported that the dump valve got stuck open and produced water overtopped the fiberglass tank. The location had been scraped of visually impacted material.

<p>On October 26, 2018 COGCC SW EPS Jim Hughes conducted an environmental field inspection of the Linde Inc. Airco #2 Natural Gas Well Spill/Release Point ID #458267. A Linde representative was on site during this field inspection. It was reported that the dump valve got stuck open and produced water overtopped the fiberglass tank. The location had been scraped of visually impacted material.</p> <p>Provide waste transportation and final disposition information in accordance with 907.b.2 for all E&P waste transported off site.</p> <p>The flow path of the release followed a drainage feature to the edge of a sandstone cliff. A site map indicates that the release terminated within the dry drainage feature that continues below the cliff band.</p> <p>The operator shall provide a Form 27 Site Investigation and Remediation Workplan detailing ongoing and proposed remediation activities.</p>	hughesjo	11/21/2018
