COGCC Comments

Comment	User	Date
<p>On November 15, 2018 COGCC SW EPS Jim Hughes conducted an environmental field inspection of the BP PLA-9 CDP Spill/Release Point ID #459062. For more information regarding this release, please refer to Initial Spill/Release Report Document #401839470. Damp areas were observed from the slug catcher onto an adjacent Hilcorp facility. The release apparently followed a storm water control berm and then an erosional rill in the hillside onto the decommissioned facility.</p> <p>Provide sample results via a supplemental Form 19 upon receipt.</p> <p>The operator shall provide a brief description of this location's function. Specifically, but not limited to, what wells contribute produced water to this location, and the final disposition of E&P waste being transported through this facility.</p>	hughesjo	11/29/2018
