<p>Comment: Recent excavation in the northern diversion and along the northern edge of the working area has resulted in disturbed soils placed up slope from diversions. These soils will rapidly erode and need stabilization measures such as revegetation.</p> <p>Corrective Action: Install erosion controls to stabilize disturbed soils along the northern edge of the project area. Corrective action date is prolonged to March 2019, to account for winter soil conditions.</p>						Date: 03/01/2019
