DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudlogging jobs, cementing points, and all other important proposed work)

We have drilled this well to a total depth of 5161 feet and have encountered three productive sands, 3094'-5112', 4130'-4156', and from 2766' to 2778', and it is our intention to complete this well as outlined on the attached completion program.

This is in confirmation with Mr. D. E. Bowen's verbal conversation with your Mr. E. A. Swedenborg on December 14, 1951.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
