**Interim Reclamation:**

Date Interim Reclamation Started: \_\_\_\_\_ Date Interim Reclamation Completed: \_\_\_\_\_

Land Use: DRY LAND

Comment: Project area is surrounded by pinyon juniper woodland. Revegetation on well pad cut and fill slopes is becoming established in portions, but is sparse in other portions. This needs to be monitored as re-seeding will be required if vegetation cover is not increasing.

Comment: Recent excavation in the northern diversion and along the northern edge of the working area has resulted in disturbed soils placed up slope from diversions. These soils will rapidly erode and need stabilization measures such as revegetation.

Corrective Action: Install erosion controls to stabilize disturbed soils along the northern edge of the project area. Corrective action date is prolonged to March 2019, to account for winter soil conditions.

Date: 03/01/2019

Pits:  NO SURFACE INDICATION OF PIT
