## SOURCE REMOVAL SUMMARY

Describe how source is to be removed.

From August 29, 2018 and September 25, 2018, 2,112 cubic yards of impacted soil above COGCC Table 910-1 standards was transported under manifest to Buffalo Ridge Landfill. Confirmation soil samples collected from the sidewalls and base of the excavation determined the lateral and vertical extent of impacts.

Describe how remediation of existing impacts to soil and groundwater is to be accomplished (i.e. summarize remedial action plan). Provide a brief narrative description including: technical justification, schedule for implementation, estimated time to attain NFA status, plus plans and specifications for the selected remedial action technology.

No further remediation is necessary.
