VEGETATIVE COVER \_\_\_\_\_

Comment: **This location does not meet reclamation requirements; vegetation on the location has not achieved uniform establishment and is not reflective to the adjacent reference area. Vegetation on the cut slopes (west end of the location) has failed to establish, and stormwater runoff has caused erosion degradation to occur.**

Corrective Action:

Date **03/15/2019**

Repair erosion degradation, stabilize location and install stormwater and erosion control BMPs in accordance with 1002.f. Perform reclamation in accordance with COGCC 1000 series rules and establish vegetation with total perennial, non-invasive uniform plant cover of at least eighty (80) percent of pre-disturbance or reference area levels. Use a seed mixture requested by the surface owner, or a mixture prescribed by the local county NRCS. Ensure erosion controls are implemented to stabilize the seeded soil, and continue to monitor and manage this site until Final Reclamation has passed. Revegetation activities shall be completed no later than 3/15/2019
